Reasons for Allowance

1. Claims 1-15 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 8, Birleson (US 5,847,612) discloses a television (TV) tuner and a method (figure 2) comprising: a first mixer (102) for mixing a selected RF signal with a first local oscillator signal to produce an intermediate frequency signal, wherein the selected RF signal is selected via varying the first local oscillator signal; a second mixer unit (104) for mixing the intermediate frequency signal with a second local oscillator signal for producing an output signal; and phase locked loop (PLL1) coupled to the first mixer and (PLL2) to the second mixer for generating the first local oscillator signal and the second local oscillator signal according to the selected RF signal, wherein the first local oscillator signal and the second local oscillator signal are generated by a single first voltage controlled oscillator (VCO1) and a single second (VCO2) respectively (column 5, lines 20-67). However, Birleson fails to teach or fairly suggest the TV tuner and method above comprising only one phase locked loop coupled to the first mixer and the second mixer for generating the first local oscillator signal and the second local oscillator signal according to the selected RF signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 02/06/2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.
